

Certificate

This is to certify that

NETZSCH-Gerätebau GmbH

Wittelsbacherstraße 42
95100 Selb

has introduced and applied a Management System for Occupational Health and Plant Safety, that complies with the requirements of the Occupational Health- and Risk-Management System -OHRIS-.

This Management System also fulfills the "Guidelines on occupational safety and health management systems, ILO-OSH 2001" as well as the "National Guidelines on Occupational Safety and Health Management Systems".

Certificate No.
09-00393

This certificate is valid until
October 11, 2026

Colours: October 16, 2022

of Family, Labour and
Social Affairs

The OHRIS occupational health and safety management system concept therefore complies with the requirements of

- the ILO Guidelines on occupational safety and health management systems ILO-OSH 2001 and
- the national guidelines for occupational health and safety management systems.

The national guidelines for occupational health and safety management systems are considered to be a framework concept and point of reference for the federal state occupational health and safety authorities. The contents of the guidelines are mandatory for all specific occupational health and safety management system concepts by the national occupational health and safety authorities. The Regional Committee for Occupational Health and Safety and Safety Technology (LASI) has confirmed that OHRIS fulfils the requirements of the national guidelines for occupational health and safety management systems. As the national guidelines implement the requirements of the ILO "Occupational safety and health management systems" guidelines, OHRIS also fulfils the requirements of these guidelines. The fact that OHRIS fully complies with the requirements of the ILO guidelines permits the use of OHRIS in companies that operate both nationally and internationally.

The requirements of the system elements of OHRIS:2018 conform with the requirements set out in chapters 4 to 10 of the DIN ISO 45001:2018 standard for occupational health and safety management systems. An occupational health and safety management system that has been implemented based on OHRIS:2018 will therefore also fulfil the requirements of DIN ISO 45001. The spreadsheet attached shows a comparison of the system elements with the requirements of the standard.

Kind regards

Dipl.-Ing. Andreas Zapf
Ministerialrat
